AUTOMATIONS

# About Us.

## Equip.

Equip is an automation company which provides solutions for work areas, homes and other complexes. Our finely engineered products and profound experience makes us paramount in this industry. We deliver products from smart work areas to top notch security systems. The elegant, modern and simple designs provide for an unparalleled experience to all our customers. In line with our responsibility to automate the community, our services are pocket friendly and extremely efficient.

## Vision.

To be a community of people who are passionately advancing the use of technology to simplify processes in the resources around us. Endeavoring to operate harmoniously with the environment, in line with our responsibility to improve environmental performance, liaise with the social community and to implement a sustainable future for the generations to come.

## Mission.

We strive to facilitate and accelerate automation, from homes to edifices, providing premium solutions at an affordable outlay to customers panoramically.

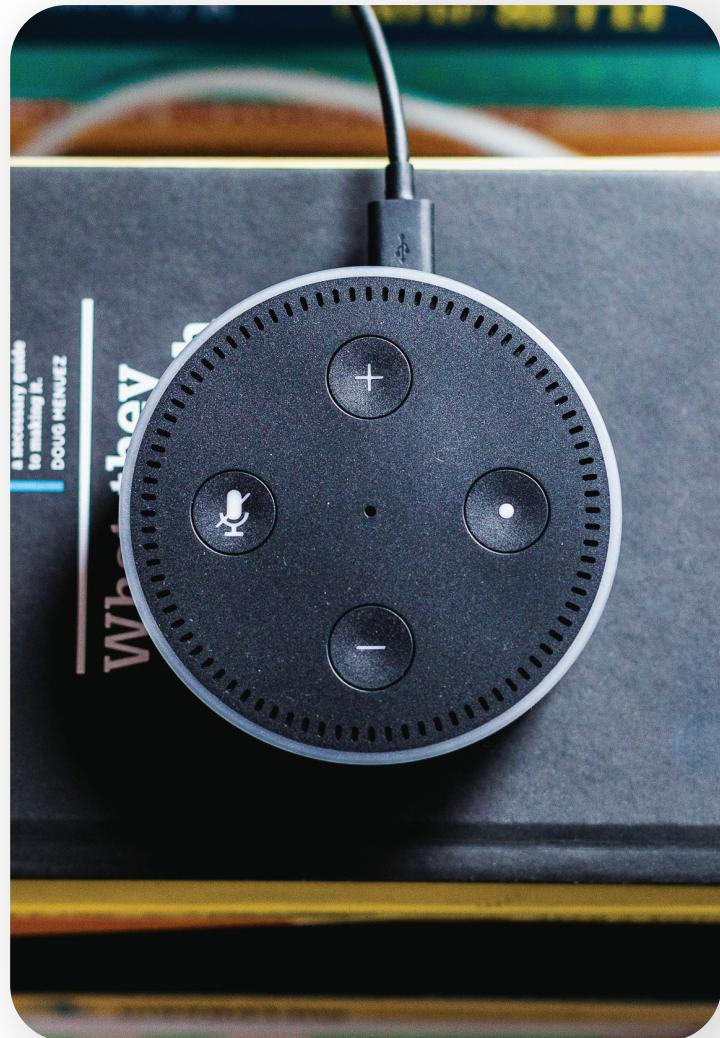

# Home Automation.

With our truly wireless engineering your comfort and safety is our priority. We give you access to any and all accessories of your home or business remotely from anywhere around the globe.

## Complete Auto-mode Solutions.

Amazon Alexa's advanced UI and machine learning proficiency has helped us to integrate voice commands into all areas of your domicile and workplace. A command through voice will allow you to change the room temperature, turn the lights on/off, set up an ambience of your choice and a lot more.

# Our Products.

## Entry level

### ● Automatic Gate

The front gate of the house is a statement in itself. We provide a wide range of selection for gates including the swing gate, slide gate, rolling gate, foldable gate and car shed shutters (garage shutters). These gates can be controlled via a remote, switch, mobile application and our RFID systems.

RFID systems implemented here are the most advanced form of automatic gate control which is integrated with an auto open/close system and secure electro magnetic locking system.

### ● Water Savers

Water is crucial for the sustenance of human life, we believe that for a sustainable future we need to do our part to preserve this precious commodity. We have automated the entire water irrigation for your lawns, so that every drop is used most efficiently. To add to the crux of the biscuit we also have an automated water level control system to keep you in check.

### ● Climate Control

We realise the importance of staying free of humidity, and giving your body that aura it needs. Wriggle into the coziness as we give you the control of your air conditioning unit/heater into your fingertips. Control everything, movement-free from the mobile application.

## Mid-range

### ● Lighting

Illumination has proved to create an aesthetic to decor, and to enhance the mood of the environment. It creates a sense of safety and comfortability in the room. Taking into account the importance of lighting, we give the master light controls to you. Our colour strips will create the perfect ambience and mood. To put the cherry on top, we also incorporate automated street lights for your courtyard.

### ● Solar Systems

We believe in a sustainable future. Solar energy is pollution free, economical and a renewable source of energy. We intend to implement the entire running of your domicile with solar energy, this comes in line with our vision and mission for a sustainable future.

**Solar Lighting:** Your home will always stay bright throughout, set up that perfect ambience indoors at any time of the day with our wide range of options.

**Solar Water Heater:** Take showers in the hot springs without worrying about the power wastage. The energy savings and efficiency are an added incentive.

### ● Security

We believe that the everything is a sham, if not preserved well. Hence we've put in some of the smartest devices to encrypt and keep track of all your belongings.

Here's how, If unauthorised personnel try to access your home/workplace our motion detectors will trigger an alarm. You can close all doors and call emergency services prior to this. Our video intercoms give you access to the front door footage and let you speak with the visitor remotely.

We also install panic alarms in the bedroom, and other rooms of your choice, so in the event of an emergency this can be triggered to sound alarms and call emergency services.

# Luxury

## CCTV

All our cameras are well equipped for the most challenging performance requirements. They come with jaw dropping features like IVS, face detection, auto tracking, people counting and many more. The advanced sensor gives you crisp images and enables you to have control over everything that's happening in your area. Our rigid engineering in all cameras leave no loose ends when it comes to monitoring.

## Automatic Curtains

To touch that sweet spot, we have implemented photo intensity sensors into your curtains which prompt an automated closure if there is a high intensity of light. Further, this cessation can be controlled through a switch, a remote or the mobile application. The models we feature include slide, roll or the blind type.

## Mini Home Theatre

Enjoy that cinematic experience with our startling range of appliances to choose from. We give you the ultimate experience in terms of audio and video. Our wide variety of options from HD Television sets to projectors, will give you the perfect blend of visual and auditory experience.

## Smart Doors

This is arguably the most important part of a truly smart home, it helps us monitor the people entering and leaving the domicile when we are away. The key can be customised to your fingerprint, a passcode, via the mobile application, an RFID card or a safety key.

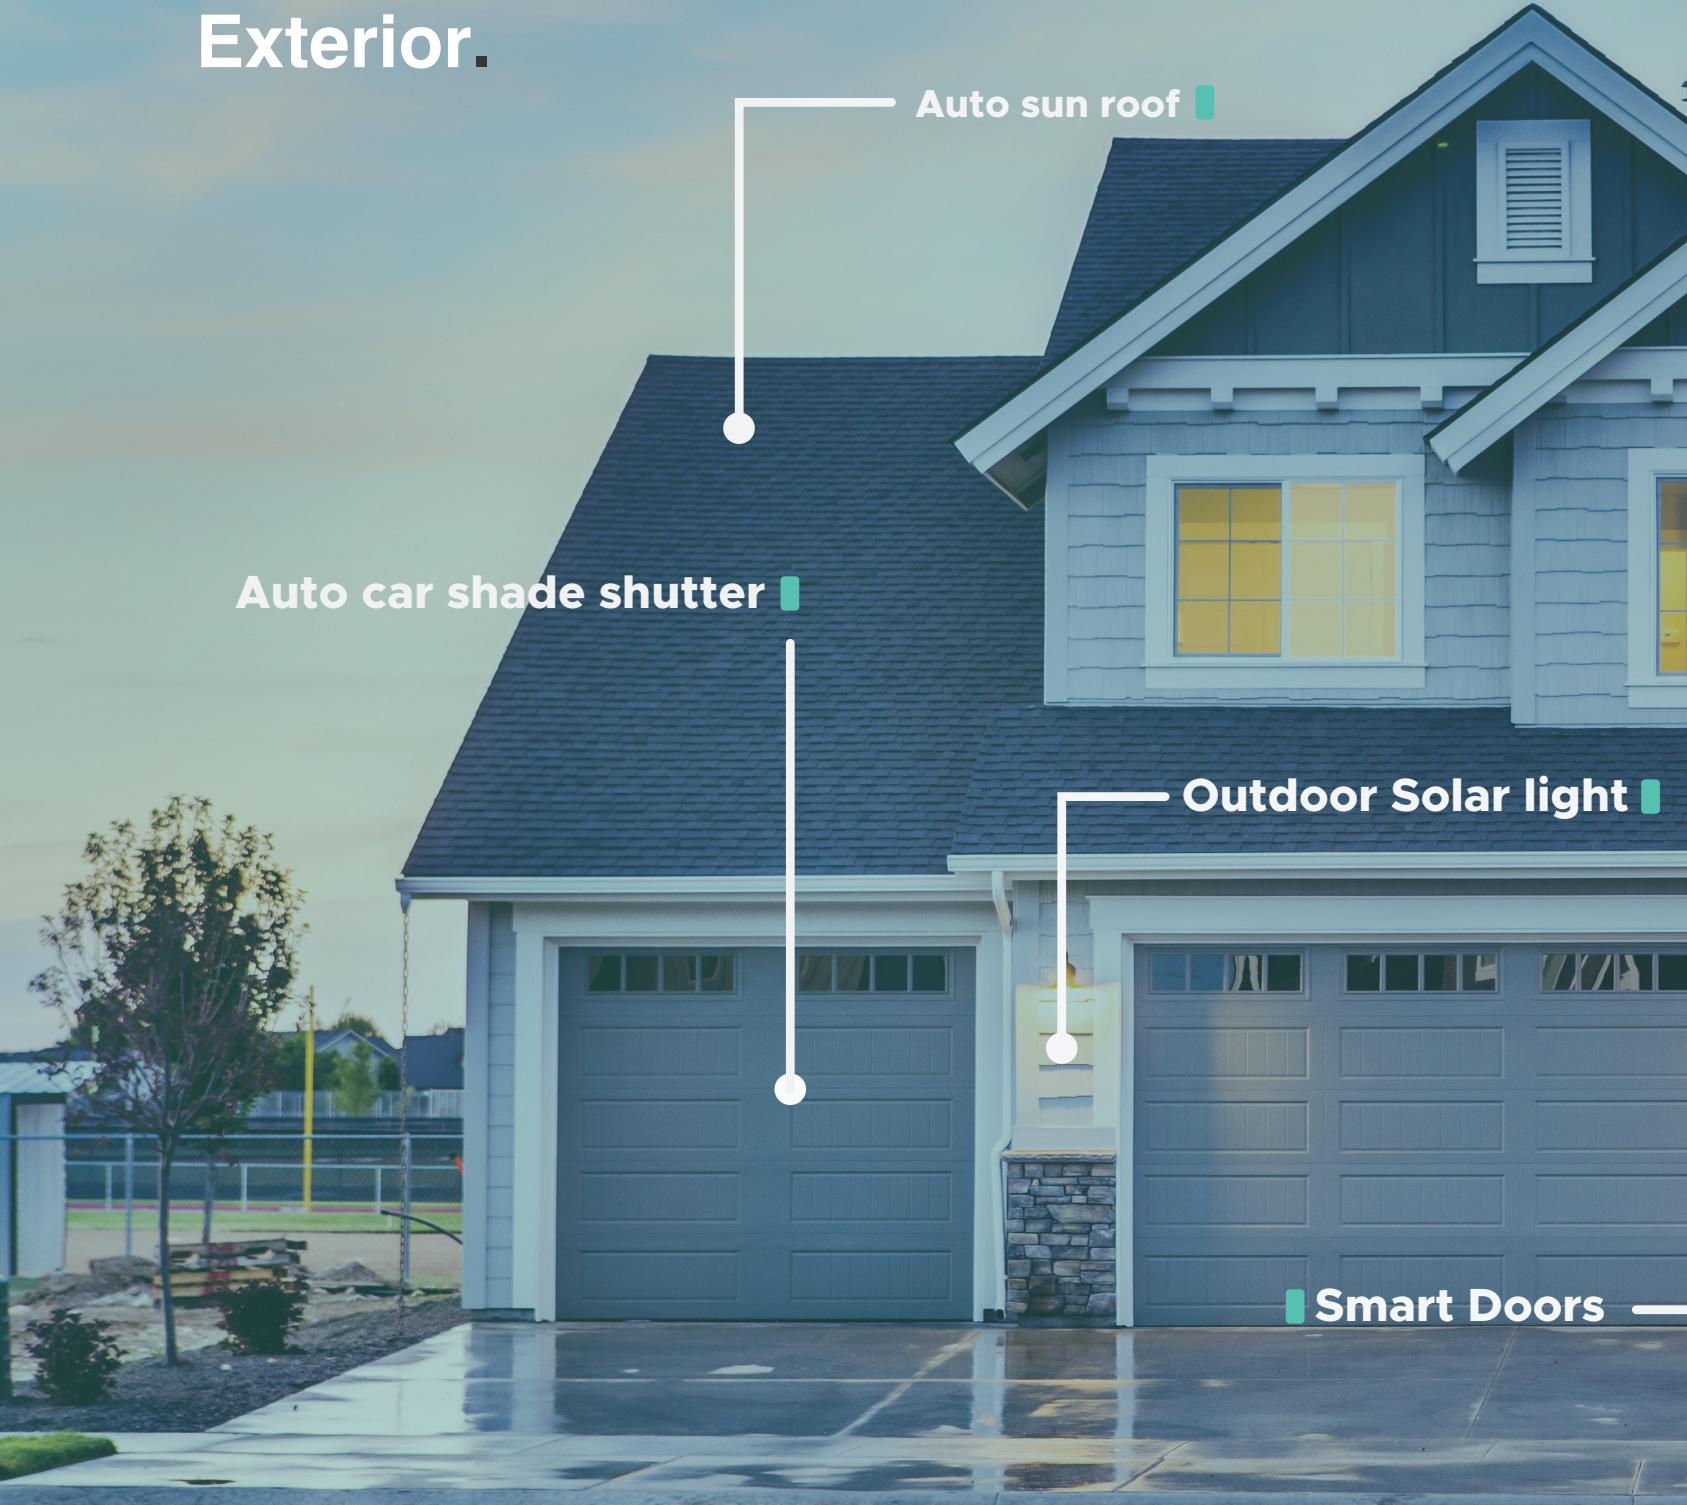

## Auto Sliding Door

They are doors which slide from the left to right, automatically when people approach the door. Its mechanism is designed such that their operations are silent and noiseless. Sensors are placed which recognises whether a person is entering. Suitable security gadgets can be installed to make them suitable for commercial use and also so that they can be controlled remotely.

## Biometric

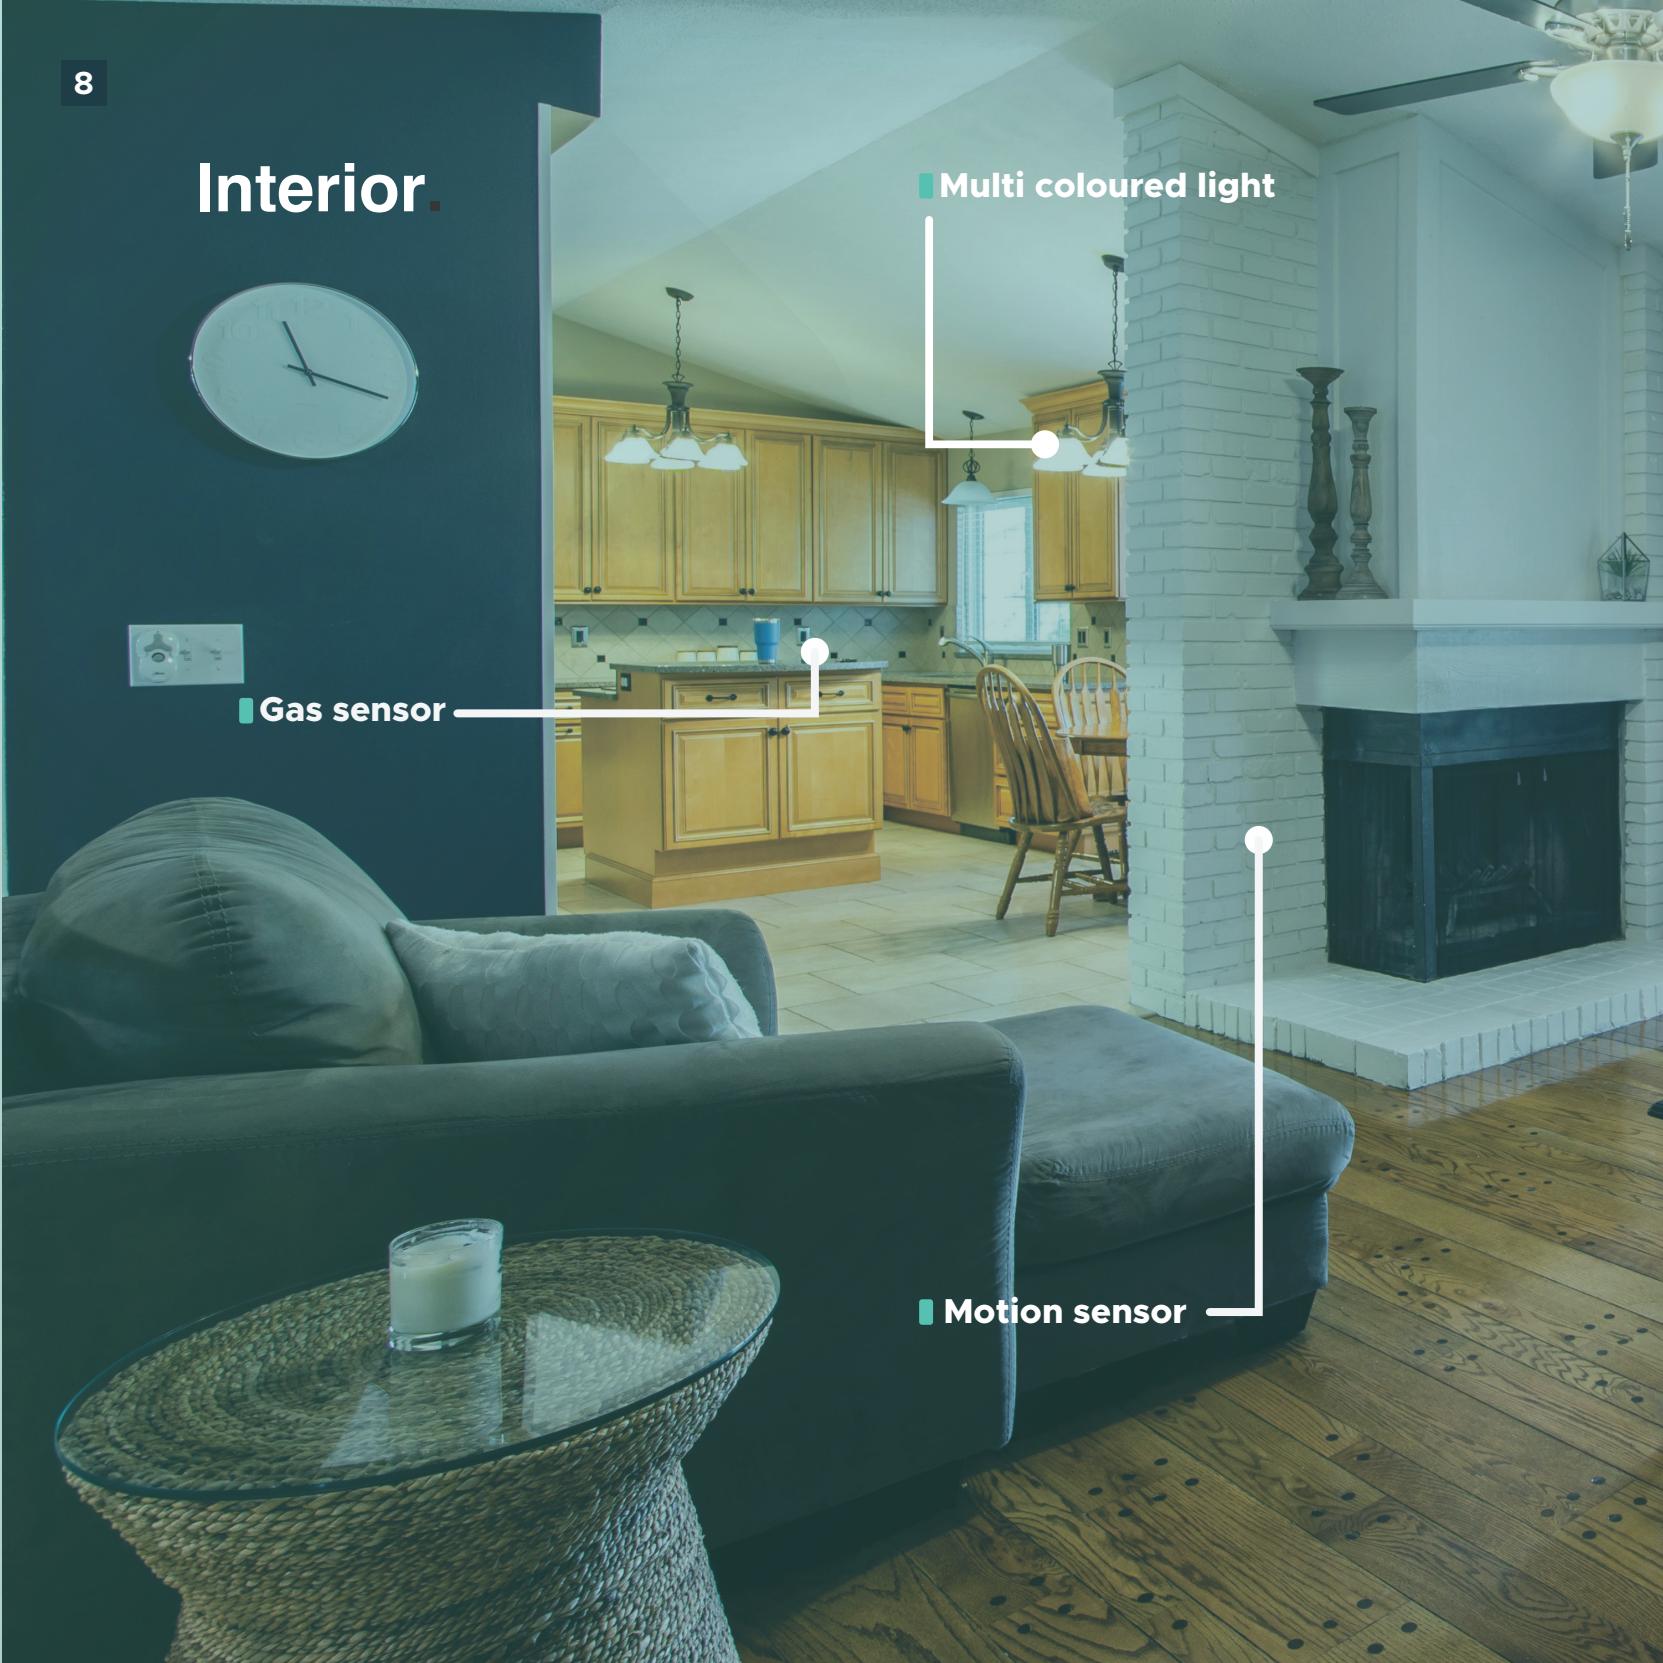

The Biometric technology is at the pinnacle of automation, it recognises and verifies an individual's identity by utilising their fingerprint. It also analyses a person's biological and behavioural traits to verify his or her identity. Biometrics have offered a scalable solution to business owners who are empowered to circumvent issues like undocumented access, ID swapping, manual badge checks, credential replacements and more.

## Others

### Auto Boom Barrier

Boom barriers have proved to be an exceptional product line for traffic control, the convenience it provides, and the enhanced security one gets. Your workplace/home can have vehicle access control and monitoring systems in place to help you stay systematic and in control of your area. It continues to show excellence in car parking management and toll management.

### Roof Opener

Just a push of a button and you get all the Vitamin-D your body needs. The sunshade of the roof slides via a remote, or the mobile application.

### Bollards

Crash and attack-resistant bollards, are hardened barrier systems used to protect buildings or compounds which require extreme security. Bollards are also extremely useful to delineate the spaces between pedestrian walkways and parking lots. The rigid engineering prevents unauthorised access into the area.

### P-Type Barriers

Pedestrians entering may sometimes have a large amount of cargo, or luggage involved. When this kind of high throughout is required P type barriers work like a charm. The smooth leeway eliminates traffic and provides easy conveyance. This highly refined mechanism is suitable for lobbies where human traffic needs to be controlled.

### Motorised Tripod Barrier

Motorised Tripod Barriers give you easy and safe access when restriction is required. This is a great product which allows only authorised personnel in, with an access card. Slim tripods are rigidly engineered, and it gives you assured quality and safety. This enforces a one-way traffic and can be used in a wide variety of environments.

### Road Blockers

Road Blockers are originally designed for locations which need maximum amount of security. They become a daunting obstacle for incoming traffic. For added safety, blockers can be interlocked with a vehicle rising barrier. The barrier arm will only raise once the road blocker has been fully lowered. This device is highly recommended for areas that require large amount of security.

### ● Road Blockers

Road Blockers are ergonomically designed for locations which need paramount amount of security. They become a daunting obstacle for incoming traffic. For added safety, blockers can be interlocked with a vehicle's rising barrier. The barrier arm will only raise once the road blocker has been fully lowered.

### ● Flap Barrier

Technology has proved to us that the need for safety and security does not need an explanation. This kind of security is extremely useful when personal surveillance is required to permit access. The most admirable feature being it gives access to the specially-abled, and does not pose as a hindrance to the flow of people traffic.

### ● Tubestile

The epitome of automation, combined with skilful engineering unravels this kind of a product. These provide utmost security, through which, only authorised personnel are allowed to pass. They prevent any attempt of unauthorised entries with a combination of various sensors.

### ● Touch Screen Switch Boards

Technology has proved to us that the need for safety and security does not need an explanation. This kind of security is extremely useful when personal surveillance is required to permit access. The most admirable feature being it gives access to the specially-abled, and does not pose as a hindrance to the flow of people traffic.
